Graphics and Tables of the SCALE 27-Group ENDF/B-IV Cross-Sections Library

Toshiyuki Suto* and Yuki Takahashi**

Abstract

The 27-group ENDF/B-IV cross section library included in the SCALE code system is a general-purpose criticality analysis library. This library has been extensively validated against critical experiments and has been widely used in the world.

The purpose of this report is to present the cross sections in a graphic manner so that the report can be useful for criticality analysts to understand the characteristics of the library. The graphic plots include total, absorption, capture cross sections and fission cross section multiplied by ν -value. In addition, numerical data of these cross sections and elastic, inelastic, fission cross section and ν -value are tabulated for convenience.

SCALE 27 群核断面積ライブリのグラフ及びデータ集

須藤俊幸*、高橋有紀**

要 旨

SCALEコードシステム内の27群核断面積ライブリは汎用の臨界解析用ライブリであり、十分な検証が行われ、臨界評価において最もよく使用されるものの1つである。このライブリのデータを視覚的に表現することで、各種の核データの特性を把握し、臨界評価を行う方々にいくらかでも役立つものとすべく、ライブリに含まれる約80核種の核データについてグラフにまとめた。グラフには、全断面積、吸収及び捕獲断面積、核分裂断面積と核分裂当たりの中性子発生数の積を含めた。また便利のために、これらに加えて弾性及び非弾性散乱断面積、核分裂断面積並びに核分裂当たりの中性子発生数の数値データを表として記載した。

1. Introduction

The 27-group ENDF/B-IV library included in the SCALE code system⁽¹⁾ is a general-purpose criticality analysis library. This library has been extensively validated against critical experiments and has been widely used in the world.

The purpose of this reports is to present the cross sections in a graphic manner. We have found very colorful and understandable graphic plots of the Hansen-Roach cross sections presented by N.L.Pruvost and M.L.Prueitt⁽²⁾. We wished to make such beautiful plots but we don't have powerful graphic software at hand. Instead, we made simpler X-Y plots and attached tables of the cross sections for convenience. We hope these plots will be of some use for understanding the characteristics of the library.

2. Explanation of the presented data

The presented data are from Scale 4.2 - 27 group neutron library based on ENDF-B version 4 data (compiled for NRC 1/27/89; last updated 9/15/93). Table of contents for this library is shown in Table 2.2. The neutron energy group structure of the library is shown in Table 2.3.

Numerical data of the cross-sections were produced by ALE (see section M15.4 in Ref.1)which is a utility module in SCALE to list information from the 27 group AMPX master library. The data presented in this reports are shown below (Table 2.1).

Table 2.1 List of the presented cross section data

item	MT number*	description	presented form graph	presented form table
total	1	total cross section	○	○
elastic	2	elastic scattering cross section	○	
inelastic	4	total inelastic cross section	○	
fission	18	total fission cross section	○	○
absorption	27	absorption cross section (sum of fission and neutron disappearance cross section) includes particle reactions	○	○
capture	102	(n, γ) radiative capture cross section	○	○
ν	452	average total(prompt plus delayed) number of neutrons released per fission event	○	
ν *fission	1452	product of ν times fission cross section	○	○

* see section F3.12 in Ref.1

In graphic data, when part or whole of absorption and capture cross sections are the same, only capture cross sections are plotted (by blue line).
